FOR IMMEDIATE RELEASE

Skyline Products Achieves Certification with Fiscal Systems
Electronic Pricing Sign and POS Integration Provides Speed to the Street

Colorado Springs, Colo., August 6, 2013 - Skyline Products, long known for its high-quality electronic fuel price displays, announced today that Fiscal Systems has approved Skyline Products as a certified interface partner. Skyline's LED signs have been put through a series of tests to verify that communication from the Fiscal Systems TravStar1 POS results in price change updates with Skyline signs. Skyline Products is the industry's first electronic pricing sign company to achieve this certification with Fiscal Systems.

POS system integration is all about speed to the street with accurate timing of updates to the pumps and electronic price sign. Skyline's integration with Fiscal Systems means that once the POS receives the price change, the electronic price sign and pumps will update as well, keeping prices accurate from the store to the street. This is the ultimate price change update process from inside the store.

Fiscal Systems TravStar1 POS is one on the many POS systems with which Skyline signs integrate, including Excentus, NCR Radiant, Retalix, Gilbarco, AutoGas, Allied, and VeriFone.

"We see great value in our partnership with Skyline Products," says Kevin D. Struthers, Executive Vice President for Fiscal Systems. "They are the industry innovator for LED signs; and we're excited to leverage their sign technology with our POS system to create an efficient and effective tool for fuel retailers to safely and accurately update their price changes from inside the store."

Chip Stadjuhar, CEO for Skyline Products, adds, "Automating price sign changes from within the store saves time and money, and gives stores the assurance they remain in compliance with pricing regulations. We couldn't be happier that Fiscal Systems chose Skyline Products to be a sign integration partner."

Since 1991 Skyline has led the way with innovative industry firsts in LED technology. Our exclusive 15-segment font displays a full-bodied numeral and individual LED hoods increase contrast providing superior readability. With font sizes from 8" to 74" numerals, Skyline's LED displays can be used in a wide variety of applications and configurations including price sign displays, pump top displays, and loyalty/discount displays. The signs can be integrated with many POS systems allowing one click price changes to the POS, pumps and signs. And, with full feedback technology, fuel managers know the right prices are advertised at all times.

About Skyline Products

Skyline Products, headquartered in Colorado Springs, CO, is the leading manufacturer and developer of electronic price displays and price management software for the petroleum marketing industry and ITS grade dynamic message signs and central control software for transportation and government vertical segments in North America.
