

TravStar1[®] EZ-Auth

Add truck fleet sales to your store's revenue

Fiscal Systems, provider of POS systems to the nation's largest truck stop chains, introduces the TravStar1[®] EZ-Auth. Now, any size store can increase sales with the ability to authorize truck fleet transactions.

Easy to use touchscreen

Color coded touchscreen displays reduce training time and errors, building customer loyalty as your cashiers quickly and efficiently authorize your customers' transactions, getting them back on the road faster.

High speed, secure authorizations

Central Services VPN Internet connection reduces transaction authorizations to a few seconds saving you and your customer time, and most importantly, building customer loyalty.

Customized for your store

The Fiscal Systems team customizes your PLUs, pricing, touchscreen, employee information and more in advance, so when your EZ-Auth POS arrives, it's ready to ring up more sales – right out of the box.

EZ-Auth – your "out of the box" solution for truck fleet sales.

Pre-Authorize Transactions Before Pumping Any Fuel

Cashiers are guided through the prompts required for each driver to provide quick service without expensive training. Every transaction can be pre-authorized to lower the risk of fraud and drive offs.

Online training and support

We're confident that once you've setup your EZ-Auth POS you will be ringing up new sales immediately. Online training is available 24 hours per day with downloadable lessons and step-by-step instructions.

Grows with your store's needs

If your store is poised for rapid growth, there is nothing to worry about. EZ-Auth POS is compatible with our full line of TravStar1[®] POS products, which include outdoor payment terminals, dispenser control, scanning, and inventory, allowing easy upgrades.

Is EZ-Auth Right for You?

Are you paying expensive fees for slow phone authorizations?

Are you paying rental fees for multiple terminals?

Are you experiencing big dollar drive offs?

Are you overwhelmed by the complexity of other POS systems?

Has your current POS become more of a hassle than a help?

Protect Your Profits with Pre-Authorized Transactions

Cashiers are guided through the prompts required for each driver to provide quick service without expensive training. Incorrect prompt entries are highlighted in red so they can be quickly corrected without paying a fee for a declined transaction. Every transaction can be pre-authorized to lower the risk of fraud and drive offs.

A pre-authorization receipt is printed showing the customer's limits for fuel, reefer, cash advance and items. The cashier can then authorize the dispenser up to the limits with confidence.

Easy to Setup, Easy to Use

Once you setup your EZ-Auth using simple, step-by-step instructions and your system is connected to the Internet, our implementation team will conduct a 2 hour remote setup session with you. We make sure to review all the features that you will need to process truck fleet transaction efficiently.

Over the next 30 days following your installation, you will receive regular follow-up calls from our setup team because we are committed to providing the support you need to be a successful operator of your new EZ-Auth.
