TravStar 2.0

TravStar 2.0 is the next evolution of Fiscal Systems' trusted TravStar platform, delivering a modern back-office solution designed for c-stores and truck stops. Building on the reliability of TravStar 1, this version streamlines operations with cloud-based access, no on-site hardware, and full control from anywhere. Say goodbye to setup headaches and hello to instant inventory updates, automated tasks, and simplified workflows.

With tools for price book management, real-time sales, inventory, fuel pricing, and more, operators gain powerful control and visibility. TravStar 2.0 helps businesses work smarter, not harder, with efficient, centralized operations and fewer manual processes weighing them down.

Key Features

POS Connectivity

Say goodbye to PC setup headaches! Streamline your operations with our Back Office Solution—no onsite hardware required. Get up and running quickly so you can focus on what truly matters.

Inventory Management

Instant barcode scanning updates stock levels in Back Office, ensuring accuracy and simplifying inventory control. Eliminate manual counts and embrace efficient inventory management.

Promotion Management

Create flash sales, deals, and more in just minutes. Schedule with precision to drive sales, attract customers with unbeatable offers, and increase engagement effortlessly.

Scan Data & Tobacco Loyalty

Seamless scan data submissions combined with a rewarding tobacco loyalty program keep your customers returning. Increase sales and customer retention in one effortless solution.

Cloud-Based Accessibility

Manage your store operations securely from anywhere with our reliable cloud-based platform.

Price Book Management

Stay ahead of the competition and boost profits with our intuitive price book system. Effortlessly set and adjust prices to maintain the perfect balance.

Realtime Transaction Insights

Access live transaction data anytime, anywhere. Gain instant insights into your store's activity and make smarter, informed decisions with ease.

Lottery Management

Streamline your lottery operations, bringing efficiency and convenience to managing lottery sales.

Connect to Your Store Anywhere. Anytime.

TravStar 2.0

Our enhanced Back Office Solution enables rapid setup, lets you launch flash sales in minutes, and easily schedule deals that boost customer engagement. Barcode scanning updates stock levels instantly, and our scan data integration with a tobacco loyalty program increases retention.

TravStar 2.0 empowers retailers to manage promotions, lottery, and house accounts without breaking a sweat. It's not just software; it's your business command center. Whether you're updating prices, analyzing sales, or syncing inventory, it's all integrated, accurate, and efficient. Built with purpose for a competitive, fast-changing industry, TravStar 2.0 doesn't just continue the legacy, it elevates it.
