

Point of Sale System

Now you can choose a single retail automation solution to manage all of your convenience retailing formats — convenience stores, truckstops and unattended cardlocks. The TravStar1[®] POS system provides the structure and the flexibility to meet the changing needs of today and the future.

The point of sale is the moment of truth in convenience retailing. Your customer's experience is determined by how quickly and efficiently they get through the checkout line or the fuel island. Your POS system must be more than the cost of doing business — it must provide a competitive advantage.

Key Features

Easy-to-Use Touchscreen

Color-coded touchscreens cut cashier training time and errors, so transactions are authorized quickly and customers get back on the road faster.

Integrated Pump Control

Interfaces to all major dispensers and card readers. Track pump status by icon and audible alert; one touch authorizes, prepays or shows sales.

Fuel Island Marketing

Reward loyalty by rolling prices back on the tender presented, and support hosted programs like AmBest, AmBuck\$ and Points to Partners.

Truck Fleet Sales

Ring up third-party fleet cards like Comdata, EFS, FleetOne, TCH and T-Chek on the same POS as cigarettes, chips and Coke.

Pre-Authorized Transactions

Every transaction can be pre-authorized to lower the risk of fraud and drive offs, with limits printed for fuel, reefer, cash advance and items.

Guided Cashier Prompts

Cashiers are walked through the prompts each driver requires. Incorrect entries highlight in red and are fixed before a declined-transaction fee.

Keyboards Built to Your Store

Touchscreen layouts are customized to your dispenser configuration, your product mix and the way your operation actually runs.

24x7x365 Helpdesk

Increase uptime with remote diagnostics and remote software updates. Reach the helpdesk by phone, fax, email or web portal.

One system. Every convenience retailing format.

Protect Your Profits

Preauthorize every transaction

Cashiers are guided through the prompts each driver requires, delivering quick service without expensive training. Incorrect entries highlight in red so they can be corrected without paying a fee for a declined transaction.

A pre-authorization receipt prints the customer's limits for fuel, reefer, cash advance and items, so the cashier can authorize the dispenser up to those limits with confidence.

Add truck fleet sales to your store's sales

Ring up third-party fleet cards on the same POS as cigarettes, chips and Coke — every transaction pre-authorized to eliminate the risk of fraud and drive offs.

The TravStar1® System Includes

- TravStar1® POS software
- Touch Dynamics kiosk with touchscreen
- Epson thermal receipt printer
- Keyboard & MSR
- Verifone PIN pad
- 3-year hardware warranty
